DIECAST ALUMINIUM DECK

RELIABLE

UNVARYING QUALITY THROUGH TIME

COMFORT

ERGONOMIC HANDLEBAR

New **ALUMINIUM PRO** models with **51 cm cutting width** for professional users. Machines designed for mowing large lawn areas of 2,000 m² and more, also for continuous use, offering a guarantee of unvarying cutting quality through time thanks to technical solutions including steel transmission, aluminium wheels and reinforced deck. The ergonomic handlebar, which is divided into two sections, optimizes manoeuvrability of the machine. The cutting height adjustment system (with a central easily accessible ergonomic handle), the plastic and fabric grass catcher (with full-bag indicator) are just some of the solutions adopted to maximize operator comfort.

TECHNICAL SPECIFICATIONS

	MAX 53 TK ALUMINIUM PRO	MAX 53 VBD ALUMINIUM PRO
DECK	aluminium	aluminium
DISPLACEMENT	196 cm ³	160 cm ³
ENGINE MAKE/MODEL	Emak K 800 OHV	Briggs & Stratton 750 series
CUTTING WIDTH	51 cm	51 cm
PROPULSION (SPEED)	self-propelled (3.4 Km/h)	propulsion with variable speed control (from 2.5 to 4.5 km/h)
CUTTING ADJUSTMENT	central	central
CUTTING HEIGHT	from 30 to 70 mm	from 30 to 70 mm
GRASS BOX CAPACITY	80 L	80 L
WEIGHT	46.5 Kg	47.0 Kg

4-STROKE ENGINES

produced by Emak and Briggs & Stratton, designed using advanced technology for easy starting and optimum performance, reliability and durability

STEEL FRONT BUMPERS

with integrated carry handle to provide greater protection of the deck against accidental impact

HIGH TORQUE AT ALL ENGINE SPEEDS

effective cutting and unfailingly steady work rate, even on particularly dense vegetation

FOLD-UP TWO-PART HANDLEBAR

make it possible to reduce overall dimensions while also improving manoeuvrability thanks to the increased length

RUGGED AND VERSATILE PLASTIC AND FABRIC GRASS CATCHER

assembled without the use of tools. The bag-full indicator signals when the grass catcher needs emptying, thus reducing the need to stop to check the level and preventing the dispersal of clippings due to overfilling

CENTRALIZED CUTTING HEIGHT ADJUSTMENT DEVICE

controlled by a rugged and ergonomic handle to select cutting heights of between 30 mm and 70 mm (5 positions) easily and effortlessly

REAR FLAP

allows clippings to be scattered directly on the ground. Removing the bag, the flap automatically assumes the deflector position, protecting the user from direct contact with clippings and debris chopped by the blade

LARGE DIAMETER ALUMINIUM WHEELS (208 mm front, 235 mm rear) with ball bearings and replaceable tyres; the smooth running high-grip profile ensures optimal traction on all types of terrain and constant quality through time

PROFESSIONAL ALUMINIUM SINGLE-SPEED TRANSMISSION for exceptional durability

NEWLY DESIGNED CUTTING HEIGHT ADJUSTMENT HANDLE for the maximum user comfort

SIMPLE CONVERSION TO MULCHING MODE WITH NO TOOLS REQUIRED

just replace the grass catcher with the mulching plug. Mulching blade and plug supplied as standard

DIECAST ALUMINIUM DECK

4 mm gauge: ensures low weight and high mechanical resistance to wear and corrosion

PROTECTIVE CLOTHING

Exceptionally lightweight, breathable high-comfort jacket with large areas of orange coloured trim for improved visibility

Professional trousers with orange coloured finish and waterproof fabric

Universal work gloves with elasticized polyester back and natural leather, comfort padding on the palms

Professional protective and noise-filtering ear defenders

Dark protective spectacles
