

NEW MULTIFUNCTION BRUSHCUTTER

Oleo-Mac
our power, your passion

BC 300 D

The new multifunction **BC 300 D** brushcutter, which is derived from the technology employed in professional machines, is designed to meet the garden care requirements of **home users** and the needs of **groundcare professionals** for maintenance of urban green spaces including parks, residences and resorts. **Oleo-Mac** provides an answer for both user groups in the form of a multifunction machine that can be quickly converted from brushcutter to hedgetrimmer, pruner or blower.

The compact and lightweight engine unit features a **no-tools coupling system** that maximizes **ease of use and practicality** in all seasons: for grass cutting

and hedge trimming in the spring, or for pruning duties and leaf blowing during the autumn months.

Each application is managed separately and can be purchased at a later date on the basis of changing requirements. Users can also order an extension that increases the length of the drive tube to allow the tool to reach higher hedges and branches: this makes it possible to dispense with the need for impractical and potentially dangerous ladders or access platforms.

Using just one engine unit for all applications means simplified maintenance and refueling while simultaneously reducing the space required for transport or winter storage.
