

ALLROAD FLEX 4 LAWMOWERS

The **ALLROAD FLEX 4** models are an evolution of the **ALLROAD PLUS 4** range, combining the versatility of the **4-cutting device** system (mulching, collection, side discharge and rear discharge) with large-diameter wheels for excellent maneuverability.

They also feature a multi-position adjustable handlebar, easily operated through a practical control, which can be quickly folded over the deck for more compact storage and easier transport.
